

Again no //AnnotationStraight/Frame element.  
But with //ChartPage@view set to 50 (percent)...  
...chart page dimensions shrink to the half

Thus again text output tied to top left corner of chart page.

so //AnnotationStraight@anchor can have any available value.

This sample uses the single-frame layout defined in system preferences  
(`//node[@name='ChartPage']/map/entry[@key='layout']` in preferences file).  
Note difference to previous sample: explicit layout definition not tied to `//ChartPage@view` but full page.

`//AnnotationStraightFrame[@anchor=middleleft], //AnnotationStraight[@anchor=middleleft]`  
`//AnnotationStraightFrame[@anchor=middleleft], //AnnotationStraight[@anchor=middleleft]`  
`//AnnotationStraightFrame[@anchor=middleleft], //AnnotationStraight[@anchor=middleleft]`

# CHARTA CAELI

A custom layout example.

## Legend

Symbol Description

- |   |  |
|---|--|
| ⊕ | Point of interest.                                     |
| ● | Common star.   |
| ● | Double star.   |
| ⊙ | Multiple star.   |
| ⊙ | Variable star.   |
| ⊙ | Variable star with large amplitude and high frequency. |
| ⊙ | Variable star with large amplitude and low frequency.  |
| ⊙ | Variable star with low amplitude and high frequency.   |
| ⊙ | Variable star with low amplitude and low frequency.    |
| ⊙ | Bright nebulae.  |
| ⊙ | Dark nebulae.  |
| ⊙ | Planetary nebulae.                                     |
| ⊙ | Open cluster.  |
| ⊙ | Globular cluster.                                      |
| ⊙ | Fiat galaxy with elliptic shape.                       |
| ⊙ | Galaxy with elliptic shape.                            |
| ⊙ | Galaxy with circular shape.                            |
