

No //AnnotationStraight/Frame element hence a layout with no frames at all. Text output is tied to top left corner of chart page. //AnnotationStraight@anchor should be 'topleft'. Try other vaules to find out why.

Again no //AnnotationStraight/Frame element.
But with //ChartPage@view set to 50 (percent)...
...chart page dimensions shrink to the half

Thus again text output tied to top left corner of chart page.

so //AnnotationStraight@anchor can have any available value.

This sample uses the single-frame layout defined in system preferences
(//node[@name='ChartPage']/map/entry[@key='layout'] in preferences file).
Note difference to previous sample: explicit layout definition not tied to //ChartPage@view but full page.

//AnnotationStraightFrame[@anchor=toptleft], //AnnotationStraight[@anchor=toptleft]

//AnnotationStraightFrame[@anchor=toptright], //AnnotationStraight[@anchor=toptright]

//AnnotationStraightFrame[@anchor=middleleft], //AnnotationStraight[@anchor=bottomright]
//AnnotationStraightFrame[@anchor=middleleft], //AnnotationStraight[@anchor=middleleft]
//AnnotationStraightFrame[@anchor=middleleft], //AnnotationStraight[@anchor=toptright]

//AnnotationStraightFrame[@anchor=bottommiddle], //AnnotationStraight[@anchor=bottommiddle]

CHARTA CAELI

A custom layout example.

//CircleParallel for declination (δ) 0°

Legend

Symbol	Description
--------	-------------

- | | |
|---|--|
| ⊕ | Point of interest. |
| ● | Common star. |
| ◐ | Double star. |
| ◑ | Multiple star. |
| ⊙ | Variable star. |
| ⊛ | Variable star with large amplitude and high frequency. |
| ⊜ | Variable star with large amplitude and low frequency. |
| ⊝ | Variable star with low amplitude and high frequency. |
| ⊞ | Variable star with low amplitude and low frequency. |
| ◻ | Bright nebulae. |
| ◼ | Dark nebulae. |
| ☾ | Planetary nebulae. |
| ⊖ | Open cluster. |
| ⊗ | Globular cluster. |
| ⊘ | Flat galaxy with elliptic shape. |
| ⊙ | Galaxy with elliptic shape. |
| ○ | Galaxy with circular shape. |
